Part II	Writing Amazon Web Services Programs	77
Chapter 4	Starting the Development Process	79
	Choosing a Communication Method	80
	Using XML over HTTP	81
	Using XSLT	82
	Using SOAP	82
	Selecting a Platform	83
	Writing Desktop Applications	83
	Writing Small Form Factor Applications	86
	Writing Cellular Telephone Applications	87
	Writing Mixed Environment Applications	88
	Selecting a Development Language	89
	Choosing a Language that Meets Specific Needs	89
	Considering Your Skills and Abilities	90
	Defining Language Limitations	90
	Understanding Internationalization Issues	91
	Determining When to Internationalize a Site	91
	Considering the User's Location	92
	Performing Language Encoding	94
	Understanding Amazon Web Services Limitations	94
	Overcoming Currency Issues	96
	Your Call to Action	96
Chapter 5	Writing Applications Using VBA	99
	Understanding the Benefits of Using VBA	100
	Resources for Learning VBA	101
	Understanding Scripting of Web Services	102
	Advantages and Disadvantages of VBA	103
	An Alternative to VBA	104

Developing with Microsoft Excel	108
Creating a Data View Using XML over HTTP	108
Defining Graphs and Charts	111
Developing with Microsoft Word	114
Automating Reports Using SOAP	115
Using the Web Service References Tool	119
Your Call to Action	123
Chapter 6	125
 Writing Applications Using Visual Studio	125
Using Web Services from Any Visual Studio Version	126
Resources for Learning Visual Studio	126
Using Visual Studio 6	127
Using Visual Studio .NET	127
Developing with Visual Basic 6	129
Getting the Microsoft SOAP Toolkit	129
Adding a SOAP Toolkit Reference to Visual Basic 6	132

Creating an ASP.NET Application	159
Using the ASP.NET Applications in this Book	162
Using Microsoft Access as a Database	163
Using SQL Server as a Database	167
Writing a Program with Database Support	172
Your Call to Action	173

Chapter 7	Writing Applications Using PHP	175
	Understanding the Benefits of Using PHP	176
	Resources for Learning PHP	177
	Downloading and Installing PHP	178
	Using the Amazon Supplied File Example	180
	Developing an XML over HTTP PHP Application	184
	Using MySQL as a Database	190
	Writing a PHP Application with Database Support	191
	Setting Up the Database	191
	Writing the Sample Application	191
	Your Call to Action	197
Chapter 8	Writing Applications Using Java	199
	Understanding the Benefits of Using Java	200
	Resources for Learning Java	201
	Understanding Java Browser Issues	203
	Using the Amazon Supplied Code	204
	Performing the Required Setup	205
	Using the Examples for Your Own Code	207
	Developing a Simple Java Application	210
	Configuring the JCreator Editor	210
	Writing the Application	212
	Writing a Java Application with Database Support	214
	Your Call to Action	223
Chapter 9	Writing Applications for Mobile Devices	225
	Understanding Mobile Device Limitations	226
	Special Add-ons	226
	Networking	227
	Operating System	228
	Screen Size	229
	Color	229
	User Interface	230
	Working with Emulators	231
	Visual Studio .NET Built-In Emulator	232
	Microsoft eMbedded Visual Tools	233

Openwave SDK	234
SmartPhone	237
Designing for Local or Remote Data Management	237
Developing for a Pocket PC	239
Using Older Microsoft Products	240
Using the .NET Compact Framework	244
Using Third Party Development Products	247
Developing for a Cellular Telephone or Palm Device	249
Your Call to Action	251

Part III Refining Your Amazon Web Services Program 253

Chapter 10 Crafting Your Application 255

Considering Performance Issues	256
Addressing Speed Concerns	256
Addressing Efficiency Concerns	258
Considering Reliability Issues	259
Considering the Data Refresh Requirements	260
Using Offline Storage Effectively	261
Choosing the Correct Offline Storage Strategy	261
Selecting a Database that Suits Your Needs	262
Considering Database Storage Alternatives	262
Using Power Searches Effectively	263
Performing Blended Searches	265
Performing Browse Node Searches	266
Your Call to Action	268

Chapter 11 Considering User Needs 269

Targeting a Specific User Type	270
Designing Flexible Interfaces	271
Addressing Users with Special Needs	274
Adding Hints for Desktop Applications	274
Adding Hints for Web Applications	276
Designing for Privacy Issues	278
Working with Wishlists	282
Using Listmania!	284
Your Call to Action	286

Chapter 12	Other Refinements You Should Consider	289
	Adding Feedback to Your Application	290
	Designing User Feedback	290
	Developing Automated Feedback	293
	Using the Amazon Honor System Payments	294
	Using Sales-Oriented Searches	295
	Performing Exchange Searches	295
	Performing Marketplace Searches	297
	Performing Price Range Searches	300
